REVOLUTIONIZING COLON HYDROTHERAPY

The Angel of Water® Surround, a gravity-fed open design, is the premier colon hydrotherapy system and is the first choice for hospitals around the world. Whether used prior to endoscopic or radiological exam, as a pre-operative preparatory procedure, or for evacuation of an impacted colon, the Angel of Water® is the safest, simplest, and most effective solution.

The Angel of Water® Surround is also the perfect system for clinics and medical spas demanding the finest craftsmanship and state of the art technology. Its advanced design now brings elegance, simplicity, and dignity to colon irrigation.

The Angel of Water’s aesthetics invite the patient to enjoy a comfortable reclining chair experience lasting approximately 30-40 minutes. Patients will experience dramatic elimination results after one session and will appreciate and prefer the procedure over oral preparatory drinks, the side-effects of which often lead to patient dissatisfaction and noncompliance. Staff members will appreciate our product’s effectiveness, ease-of-use, and safety features. The Angel of Water® Surround is quiet, sanitary, odorless, easy to clean and maintain, and requires only a small room. The Angel of Water® will enhance the best efforts of doctors and therapists in all settings.

THREE KEY POINTS FOR COLON HYDROTHERAPY USING THE ANGEL OF WATER CM-1®

1) HYDRATION
Delivers water safely and comfortably to irrigate the colon.

2) ACTIVATION
Hydration activates peristalsis of the colon.

3) EVACUATION
Peristalsis evacuates the contents of the colon.
Features

- 8 Gallon hypo-allergenic tank
- Gravity-fed flow

- Personal shower sprayer
- No exposed pipes or wires
- No sharp corners
- Built-in safety rail
- Internal exhaust fan
- Under-cabinet storage
- Dual control panels
- Temperature control safety sensor
- Uni-body basin for easy cleaning
- Basin cabinet toe-kick
“And by all means, I prefer [that] my patients undergo colon hydrotherapy the morning of a colonoscopy. It’s a safe way to cleanse the gut.”

Robert Charm, MD, Walnut Creek, CA

“I am very well acquainted with the colon’s functions, and my true belief is that colon hydrotherapy is the perfect cleansing medium for preparing the patient for colonoscopy. It’s a much better way of getting the human colon ready for an operation than having a patient swallow a gallon of that pre-surgery solution known as ‘Colon-Go-Lytely.’”

Leonard Smith, MD, University of Florida, Gainesville, FL

“I have used and worked with all three open colonic devices on the market, as both a client and a therapist. I love the Angel of Water®. It is easy to use, comfortable and aesthetically appealing. The Angel of Water® also comes with the services of a very professional staff at Lifestream, who are available for technical, emotional and educational assistance.”

Theresa Smith, RN, Phoenix, AZ

“I was looking for the most appropriate colon hydrotherapy equipment for my anti-aging medicine practice when I was introduced to the Angel of Water®. I knew that this equipment would best fit my busy practice and thought it the most aesthetic equipment available for the intended purpose. My staff, patients and I have been very happy with the results of my choice and the system’s ability to operate without odor. Most importantly, the equipment looks very welcoming and not intimidating at all.”

Maria Sulindro, MD, Pasadena, CA

“Our Healthy Glow Clinic has been using the Angel of Water® system for many years. Our concern has all along been cleanliness, safety and effectiveness. We find that Angel of Water® has fulfilled all the above. Our clients have also expressed their satisfaction with the system.”

Y.M. Wong, MD, Hydrohealth, Singapore
